CMC projects  
managed

Mainly for **biological products**

Gene  
therapy

Cell  
therapy

Antibodies  
ADC

Exosomes  
Secretome

Chemical  
entities

**Biotherapies Days**

# Our services

A tailored approach to cover our clients' specific needs

## ✦ Consulting

We provide either a focused expertise or a comprehensive support across the entire pharmaceutical value chain.

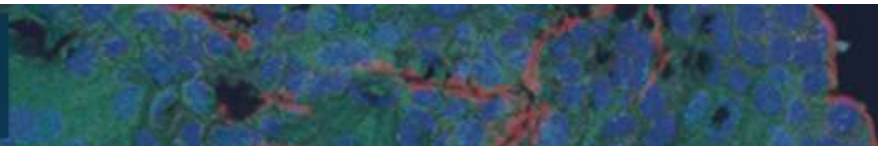

## ✦ SMO

We offer a dedicated bioproduction unit for preclinical and clinical trials, supported by a unique infrastructure and an experienced team.

**Biotherapies Days**

# Why choose Inits **SMO**

A **disruptive** model where the partner **keeps the control**

## Existing options

### Self-financing

Risky, expensive

Lack of expertise and “GMP culture”

Less funds available for clinical development

Overall difficult to justify

### Subcontracting

Less flexible

Low control over the production steps and timings

Know-how risks

Unbalanced relationship between the Biotech and the subcontractor

## inITS

A bioproduction service at your disposal

Flexible, multiproducts with modern and high-tech tools

Keep control over the process

A fully integrated service provider

**Biotherapies Days**

# We aim for clinical development

**Biotherapies Days**

# Building a tailored space for our clients

We are in the process of building a dedicated private space for our SMO clients (BSL2)

- Custom-built for their needs
- Easy access: close to the Montpellier airport & train station

**3200 m<sup>2</sup>**

of spaces

**3 R&D  
production suites**  
+ 3 client office spaces

**4 GMP  
production suites**  
+ 4 client office spaces

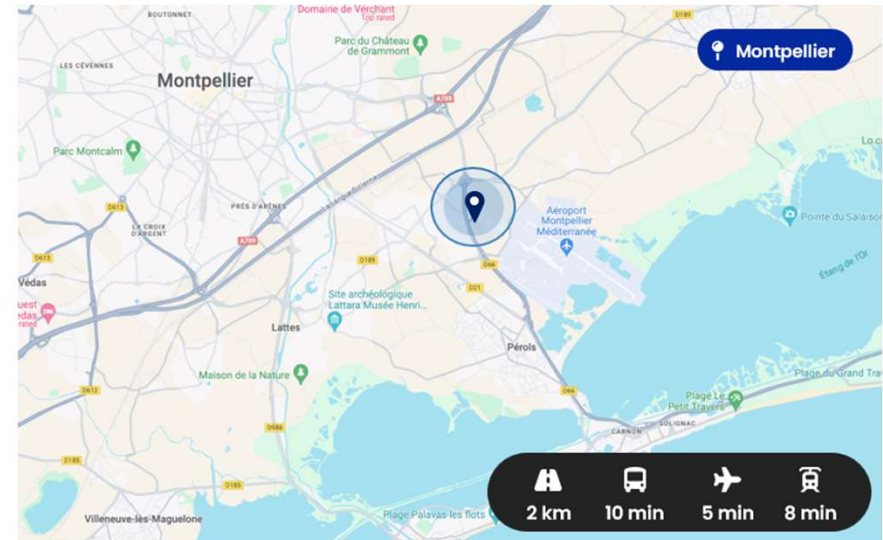

**1 F&F GMP suite**

**3 QC laboratories**

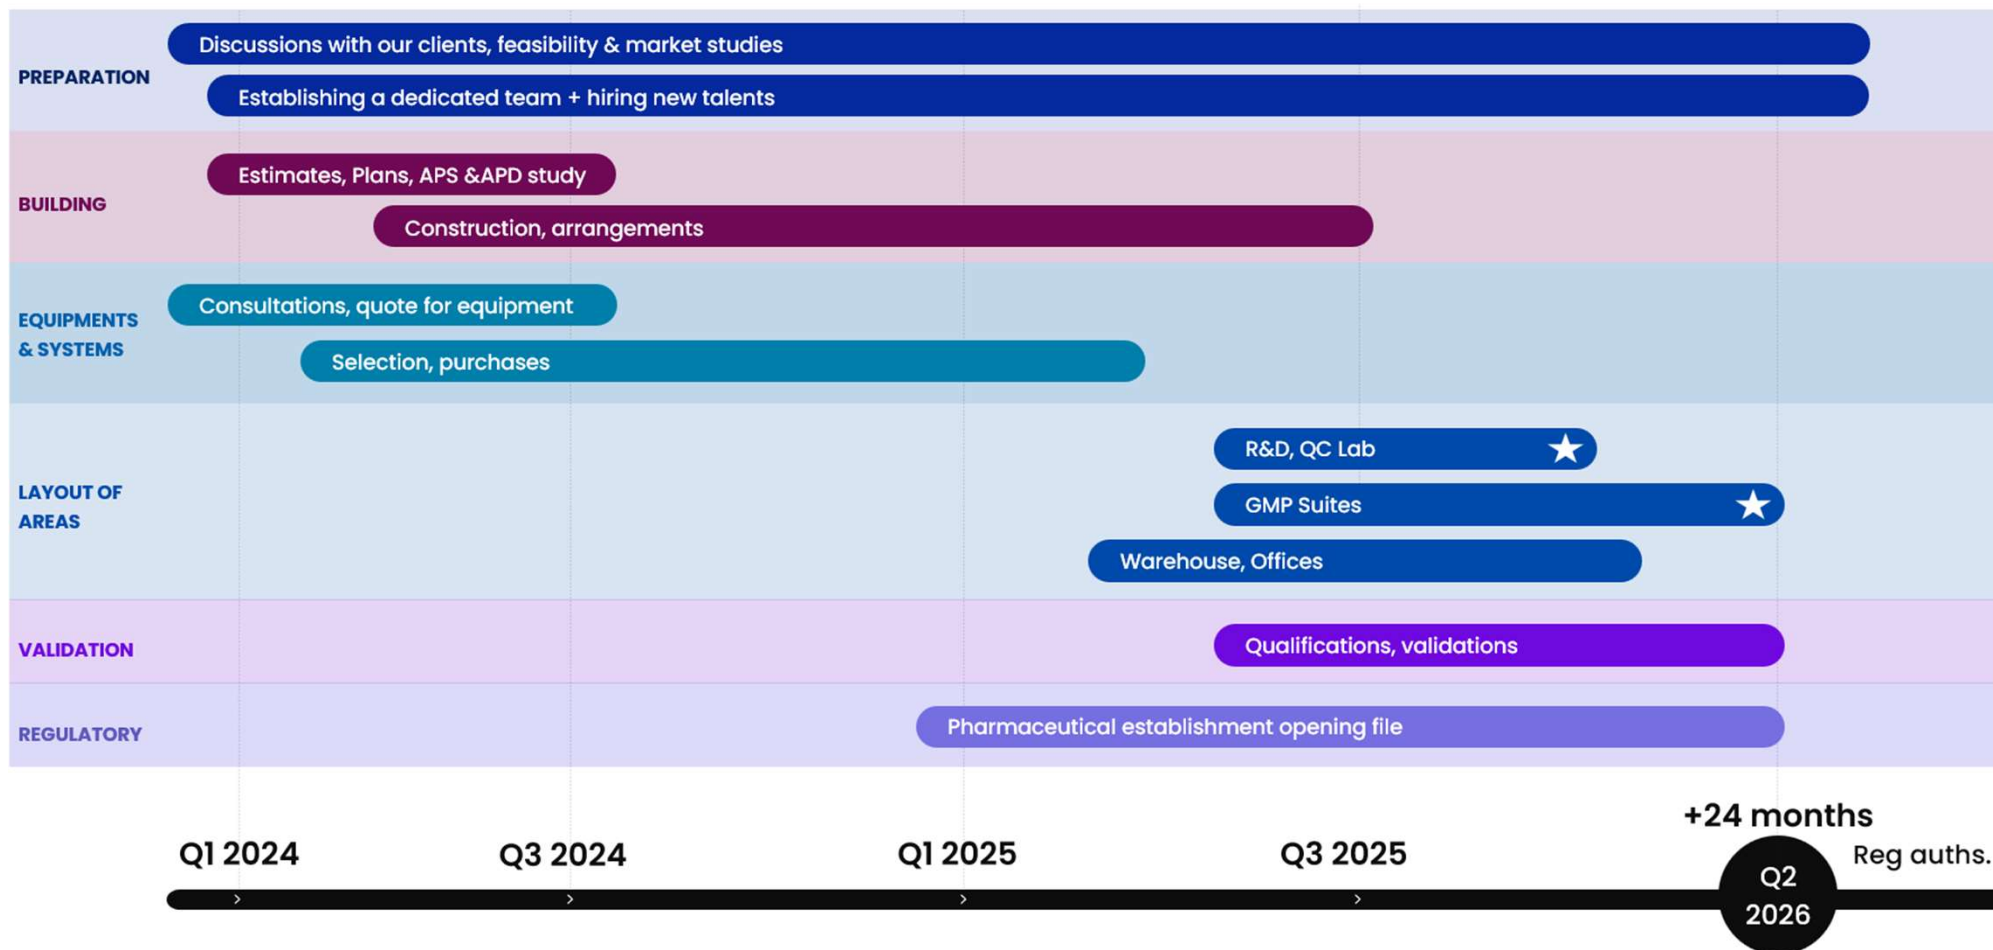

**1 packaging suite**
